Pure Melipona Honey Eye DropsBenefits

Thanks to its antibacterial and anti-inflammatory properties, melipona honey combats conditions such as cataracts, conjunctivitis, infections, and dry eyes. It also aids in healing scratches on the eye and eyelids post-surgery.

Mayan honey can be used to clear and activate one's pineal gland.

Honey in the Eye YouTube

Instructions for use on our YouTube Channel Bee The Future Maya

Pineal Activation YouTube

- **Watch instructional videos available through QRS.**
- **Place one drop in each eye before bedtime and allow it to sit overnight.**
- **The drops can be used every three days. After one month of use, you may gradually increase the dosage if necessary.**
- **To reduce any stinging sensation, consider diluting the honey with purified water in a 1:1 ratio for eye drop application.**
